Kapunda Rifle Club. 8th February, 2020. The Light River Aggregate, Stage 5 saw 18 members and visitors take to the field to compete in conditions that were not ideal. The squally winds that varied in strength between ten and twenty miles per hour and wavering from right to left proved to be a challenge for the members. The Club also used one electronic target which performed flawlessly thought-out the day and some members opted to switch from the manual targets to use it because of the blustery conditions but unfortunately this writer missed out. Peter Larsen also introduced a visitor, Robert Dickinson that had travelled from Yorkshire (UK) and perhaps because he was used to extreme weather, out-performed members in F/Standard on the day posting 104.04 in F Std. In preparation for the Findlay Shield the shooting Calendar has been changed: Ziersch Custom Rifle Trophy at 800 yards will be held on the 15th February 2020, Kapunda Auto Pro Trophy to be shot at 700 yards will be shot on the 22nd February 2020. The Findlay Shield Trophy will be shot at 700 Yards. Please arrive early to help with the flags and target set up and remember that the main gate will be closed at 12:30pm and entrance after that time will be through the 1,000 yard gate. DC.
